

Micro-THERM Truck Mounted Systems

ENVIRONMENTAL BUSINESS JOURNAL
SOIL-THERM EQUIPMENT, INC
"Industry's Best in 2003 & 2004"

Complete SVE Thermal System !

Our latest ***Micro-THERM*** is so small, it'll fit in the back of your full-size pickup truck. And if you need propane and generator to supply up to 60 Amps of operating power, there's still room left for that too!

Performance is what this machine is all about. It'll process 300 scfm soil-vapor-extraction vapors, operates in either thermal or catalytic modes, draws extraction vacuums to 14" Hg, and operates on generator power at 200 cfm for up to 16 hours. Who wants to tow around those "other" monster dual-axle trailers when the latest, most powerful technology simply fits in the back of your truck.

When you want the most powerful cleanup technologies on the market, SOIL-THERM has the equipment for you. For more information, check out our website or give us a call!
