

Soil-Therm

Remediation Monitoring and Control (ReMAC™)

SOIL-THERM now offers the biggest advancement in environmental equipment ever! Our **ReMAC** technology allows Soil-Therm equipment operators huge advantages over all other equipment. Monitor all operation of the system, extract logged data anytime, make adjustments to optimize operation, diagnose and troubleshoot system operation before getting to the site, ensure 100% uptime through email, text, or phone notifications and much more. Also check on temperatures, flows, pressures, tank levels, flame strength, operational status, and run time, and view every screen on your Soil-Therm system as if you're standing in front of it.

Now is the time to add **ReMAC** technology to your new or existing SOIL-THERM system. Our **ReMAC** system is guaranteed to save you time, and cut project costs! Soil-Therm can upgrade your existing system with the following equipment: cellular router with nationwide service and unlimited data access and transfer, high powered digital antenna discretely mounted to main control panel, and PLC upgrades with programming and setup information for your laptop or iPhone or iPad devices. Simple to operate, and great for sending operating snapshots of the touchscreens anywhere to operators, engineers, management and your client. This is the most advanced remote capability ever!

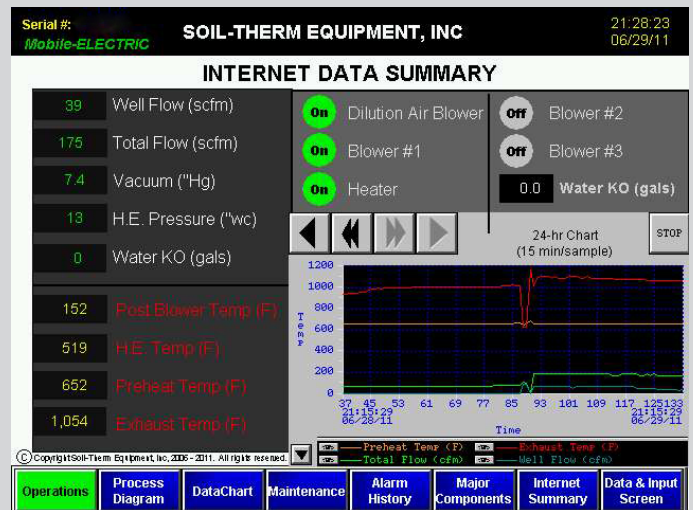

SOIL-THERM Mobile-Electric Oxidizer System

Remote Monitoring Benefits:

- Mobile cell router service throughout U.S.
- 100% equipment uptime capable
- Monitor anywhere, anytime
- Reduce O&M visits and costs
- Clean sites faster & more efficiently
- Monitor & record all datapoints to 1sec.
- Share information quickly
- Laptop, iPad and iPhone supported
- Alarms sent via text or email
- Timer operation of equipment & restarts
- Expandable

Monitoring Options:

- | | |
|--|--|
| <input type="checkbox"/> Oxygen (%) | <input type="checkbox"/> Amps (system & blowers) |
| <input type="checkbox"/> LEL (% or ppmv) | <input type="checkbox"/> Burner flame strength (V) |
| <input type="checkbox"/> Pump & Hi Alarm Levels | <input type="checkbox"/> Gallons pumped (gals) |
| <input type="checkbox"/> Position valves (digital or analog) | <input type="checkbox"/> VOC emissions (ppmv) |
| <input type="checkbox"/> Gas pressure ("wc) | <input type="checkbox"/> Voltage On/Off (V) |
| <input type="checkbox"/> Blower pressure ("wc) | <input type="checkbox"/> H.E. Temp (F) |
| <input type="checkbox"/> Temperatures (F) | <input type="checkbox"/> Hours Operation |
| <input type="checkbox"/> Vacuum ("Hg or "wc) | <input type="checkbox"/> Change Alarm settings |
| <input type="checkbox"/> Air flows (cfm & scfm) | <input type="checkbox"/> Open & adjust well valves |
| <input type="checkbox"/> Water KO level (gals) | <input type="checkbox"/> Customized to your specs |
| <input type="checkbox"/> Blower Speed (Hz) | <input type="checkbox"/> More options available! |
